

Advanced Data Science & AI Course

Equip yourself with data science skills through live, interactive lectures guided by industry expert mentors

Program Highlights

- Live interactive classes with experienced mentors
 - Hands-on projects with real-world datasets
 - Flexible weekend & evening batches
 - Personalized doubt-clearing sessions
 - Industry-recognized certification
-

Curriculum Overview

- 1. Python for Data Science**
Learn the fundamentals of Python, data structures, and libraries like NumPy & Pandas.
 - 2. Data Visualization**
Create powerful visual insights using Matplotlib, Seaborn, and Tableau.
 - 3. Machine Learning**
Supervised and unsupervised learning, model building, and evaluation techniques.
 - 4. Deep Learning & AI**
Explore neural networks, TensorFlow, and real-time AI applications.
 - 5. Capstone Project**
Apply your skills in a mentor-guided, industry-grade final project.
-

Mentorship & Faculty

- Get mentored by experts from companies like Google, Amazon, and Microsoft.
 - Weekly 1:1 sessions and career counseling included.
-

Career Support

- Dedicated placement assistance
 - Mock interviews & resume building workshops
 - Access to exclusive job opportunities with hiring partners
-

Eligibility

- Open to graduates, working professionals & career switchers
 - No prior coding experience required
-
